# Labeling Versatility to the Power of Z

Only with Epson's Z-Series industrial label printers do you get the versatility to print labels using any LabelWorks PX label media cartridge and value roll from 1/6" (4mm) to 2" (50mm), including:

- Standard Polyester (PET)
- Heat Shrink Tube
- Magnetic
- Self-Laminating Vinyl
- Extra-Flexible Vinyl
- Strong Adhesive
- Silver Matte
- Fluorescent
- Die-Cut
- Removable Adhesive
- Extra-Long Bulk Value Rolls

With Epson's Z-Series flagship, the LW-Z5010PX, you can design and print your labels using the full-color touchscreen interface and QWERTY keyboard or Epson's Label Editor software and apps (unlimited downloads and licenses included).

From the smallest heat shrink wire marker to large safety or directional labels and every label in between, you can use one printer to fulfill all of your labeling requirements - the Epson LabelWorks LW-Z5010PX.

With unmatched versatility, the LW-Z5010PX is the only industrial label printer you need. With Epson LabelWorks' no-questions-asked lifetime warranty, the LW-Z5010PX is the last printer you'll ever need to buy.

# Zee for Yourself. Ten Great Reasons to Label with a Z.

## COLOR TOUCHSCREEN

See your labels come together in color while you're designing them! Plus, the sensitive touchscreen lets you make adjustments as you go!

When you're finished, fold the touchscreen over the keyboard creating a self-contained protective case for both.

## QWERTY KEYBOARD

The familiar QWERTY layout of the keyboard makes entering your label information as easy as typing on any laptop for making labels on the go!

## EASY CONNECTIVITY

Connect computers to the LW-Z5010PX using a USB cable or choose between Wireless and Wired LAN for multiple users.

## SOFTWARE COMPATIBLE

The LW-Z5010PX is fully compatible with Epson's intuitive mobile apps and Label Editor software (unlimited downloads and licenses included). This allows you to print labels featuring icons, symbols, bar codes, QR codes, logos, or sequential alphanumeric information; even upload label data from spreadsheets!

## EASY "SNAP-IN" LOADING

Change out supplies in a snap with easy top-loading. All Epson LabelWorks PX label cartridges include pre-matched ribbon and label media, eliminating delicate ribbon rolls and making loading a breeze.

## SUPPLY VERSATILITY

The LW-Z5010PX is compatible with all of Epson LabelWorks' 180+ label cartridges and extra-long value rolls.

## LI-ION BATTERY INCLUDED

Print labels on the job site without the need for a power adapter using the Li-Ion battery (included).

## FULLY PORTABLE

Bring the LW-Z5010PX to the job site using the integrated ergonomic carrying handle.

## AUTO-REWINDER

Epson's patented rewinder attachment (optional) neatly collects long strips of printed labels onto a reel during printing. The printer inserts a shallow cut (half-cut) between labels, only cutting the label surface, not the backing. This unique feature keeps the batch together on a roll while making peeling and placing individual labels easy.

## BULK VALUE SAVINGS

Designed especially to tackle high-volume label printing for labels up to 2" wide (50mm), the LW-Z5010PX prints on Epson's new extra-long value label rolls that offer up to 145' of continuous printable label tape.

Bulk value rolls lower the total cost of labeling by 30% or more for high-volume batch printing.
